

Collaboration oppurutnities and challenges

Bosnia and Herzegovina

SWOT analysis

- Good medical basics from former state
- Good education of medical professionals
- Great basics in USA from Bosnia doctors
- Money is getting less the issue

W

- Very poor cooperation of medical prof and institutions due to organisation of country
- Loosing intrest in change due to obstacles
- Regional hospitals on much lower levels than Central or University Hospitlas
- Keeping 'status quo' due to personal intrests
- Medical statisics very week

O

- In proces of entering EU
- Standards and guidelines
- Young doctors very motivated and educated
- Rising economy
- Private practice in rise
- Clinical Centre Sarajevo is first hospital in region that has positive balance (we are making more Money than spending)

T

- Young doctors are leaving due to fact they do not get any chance for work
- Political support is mainly missing due to incompetent leaders
- Going to other countries to be treated
- Lack of real public support

Collaboration

- Real World data
- Collaborative groups
- Specific procedures
- Regional guidelines (low or middle income countries)
- Public awareness
